

Toward Lightning RubyVM

RubyKaigi2010
Technical Lightning Talk

Koichi Sasada

ko1@rvm.jp

Passionate VM Programmer

Creative Informatics,
Graduate School of Informaton Science and Technology,
The University of Tokyo

東京大学
情報理工学系研究科
創造情報学専攻

THIS PRESENTATION is about

Performance of **Ruby**VM

Speed-up, Efficient,
Optimization, ...

Our current Challenges in Sasada-Lab (Students task)

- **AOT Compiler**

- **Ruby to C**

- **Ruby** to X10

- Profilers

- **Memory Profiler**

- Performance Profiler

- Regexp AOT Compiler

- Atomic-Ruby (for Embedded)

- CI (w/ performance) environment

Sessions at
Tomorrow
Morning

My Challenge

- **VM re-design**
 - **Re-visit Method (control) frame**
 - Re-visit Relationship of **Ruby** and **C**
 - Instruction level re-design
- **Introducing Parallelism**
 - Against **Fine grain** parallelism
 - Against **Coarse grain** parallelism

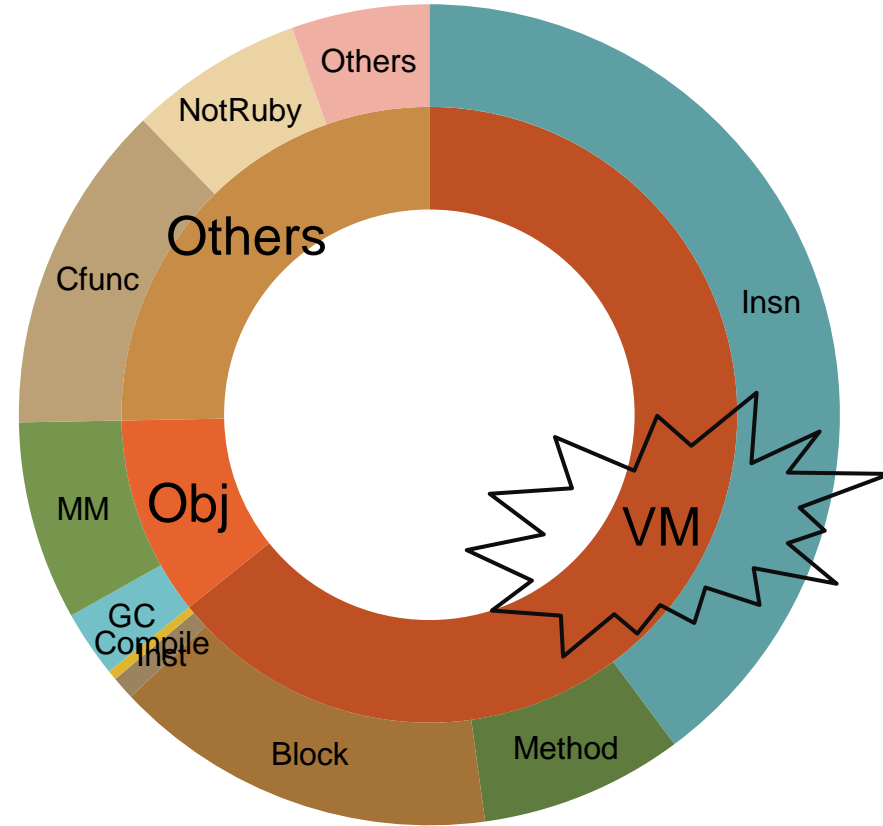

Easy Performance Analysis (1)

Micro benchmark

Fib

Pentomino

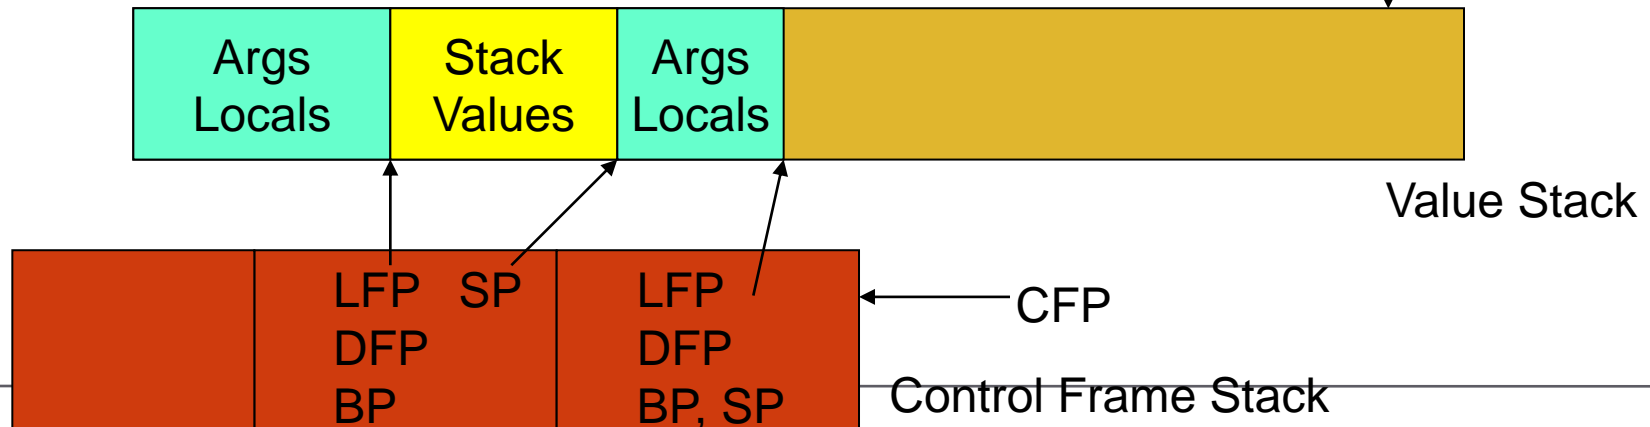

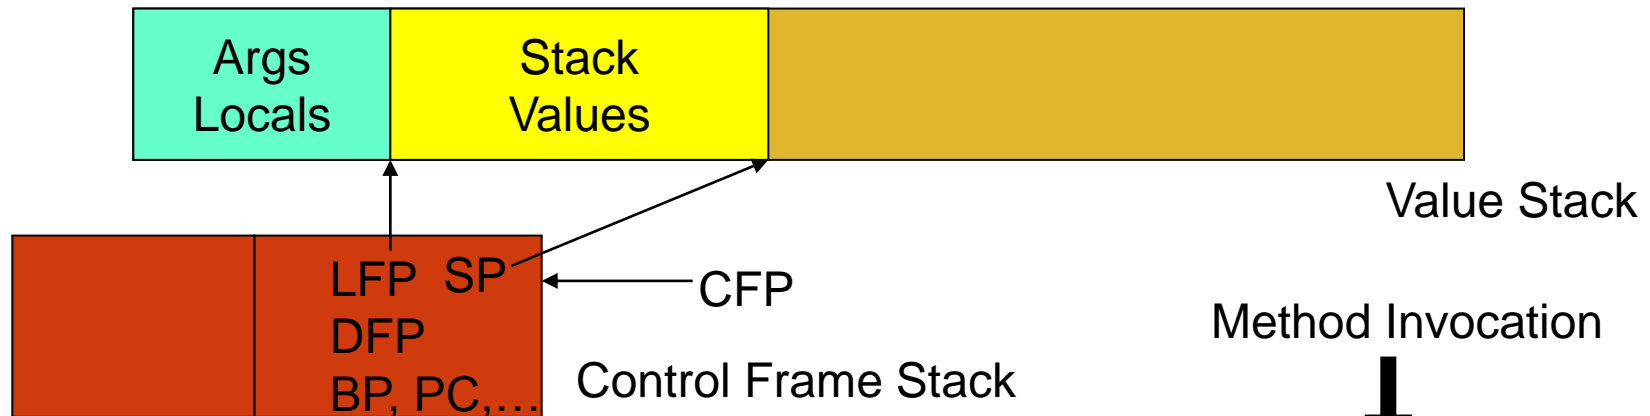

OS: Linux 2.6.31 32-bit
CPU: IntelCore2Quad 2.66GHz
Mem: 4GB
C Compiler: GCC 4.4.1, -O3
Profiled by Oprofile

ruby 1.9.3dev (2010-05-26)
Profiled by Mr. Shiba

VM Re-design

Re-visit Method (control) frame

Current control frame structure

VM Re-design

Re-visit Method (control) frame

- **Too complicated**
 - **Too many values to push**
- **Simplify frame structure**
- Redesign:**
- **VM frame structure**
 - **Method data structure**
 - **InstructionSequence structure**

DFF
BP

...

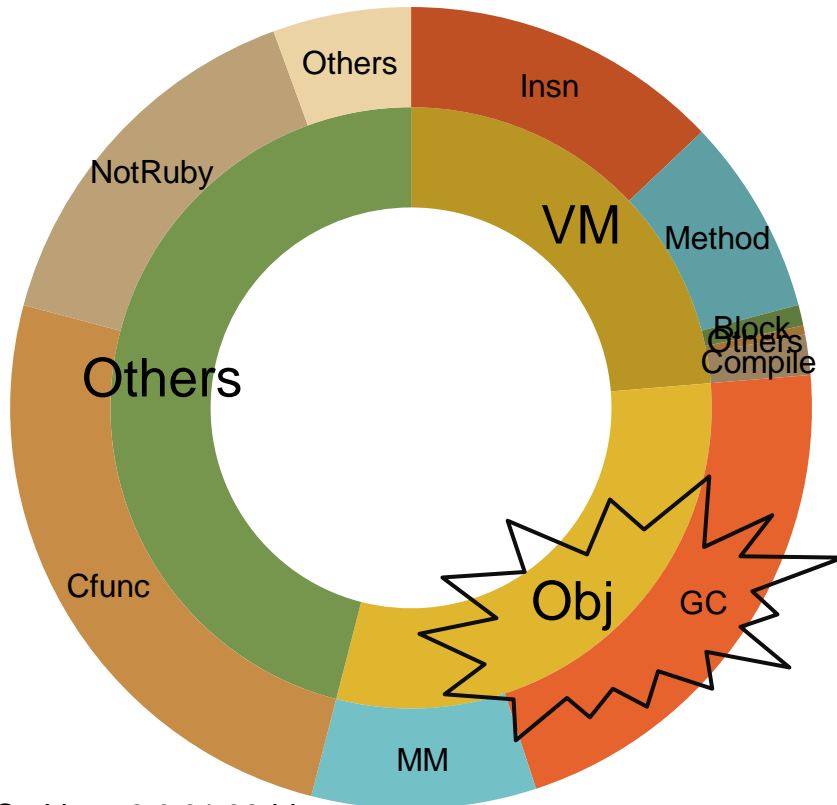

DFF /
BP, SP

DFF
BP

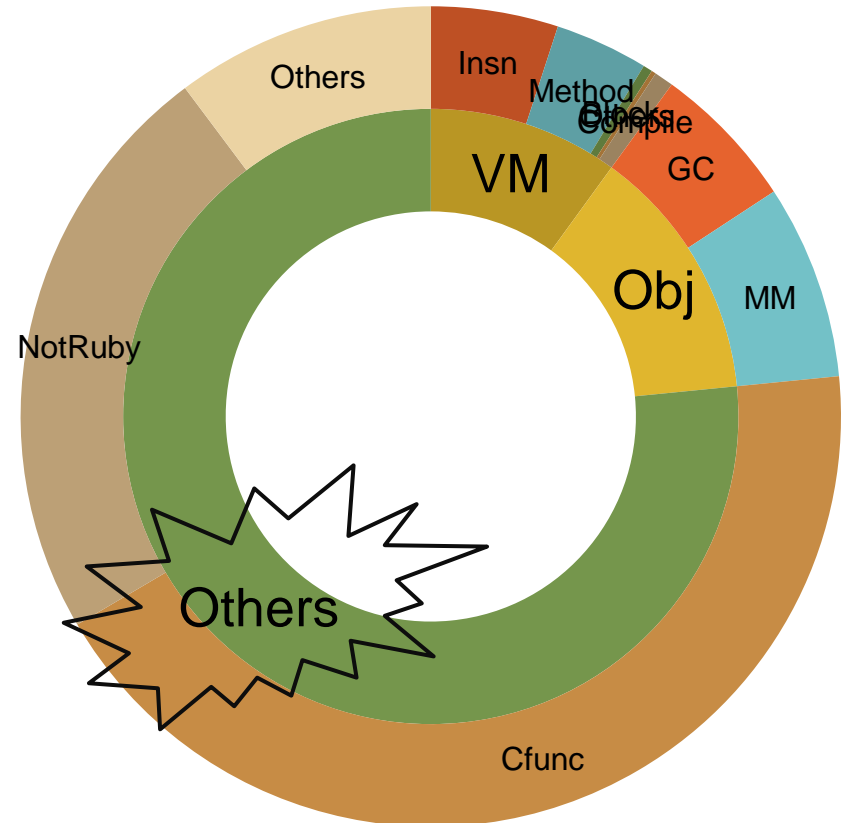

Easy Performance Analysis (2)

Macro Benchmark

rdoc

Rails

OS: Linux 2.6.31 32-bit
CPU: IntelCore2Quad 2.66GHz
Mem: 4GB
C Compiler: GCC 4.4.1, -O3
Profiled by Oprofile

ruby 1.9.3dev (2010-05-26)
Profiled by Mr. Shiba

Introduce Parallelism for Multi/Many core era

- **Parallel, not concurrent**

- **Parallel:** run simultaneously
 - Not supported by Ruby

- **Concurrent:** manage several activity
 - Supported by Ruby's Thread

Introducing Parallelism Principle

NO Parallel Threads in CRuby

**I believe parallel threads
introduce unhappy result.**

Introducing Parallelism

Fine grain parallelism

- **Run methods in parallel**
 - **Time consuming methods**
 - **Collection of independent methods**
- **Rubyist should not consider**
→ **VM run them in parallel auto.**

Introducing Parallelism

Fine grain parallelism: Solution

- Write parallel code in C level
 - C extension writer should take difficulties
- **Provide a framework to write parallel C extensions**
- **Now considering specification**

Introducing Parallelism

Coarse grain parallelism: Solution

- **Easy to consider**
- **Separate logic into VMs using MVM (Multiple-VM)**
 - MVM, a.k.a vaporware (やるやる詐欺)
 - VMs run in parallel and lightweight inter-VM communication than inter-process communication
- **Similar model as other languages**
 - Scala, Erlang, ...

Introducing Parallelism

Parallel GC

- GC consume time
→ Speedup with Parallel
- Parallel mark
 - I'm not sure about it, however, last day nari-san talk it is considerable
- Parallel sweep
 - Seems easy to support

Request

If you have applications

(1) have performance issues

(2) too slow, give up to run on Ruby

Please ask us.

**They will be important
research materials.**

我々の業界ではご褒美です。

Ono more Announcement

- **Escape from Japan (to UK)**
 - Next 2 months
 - I hope **I can concentrate in VM development**
 - To: UK people, please contact me if you have interest about my work
- Stay tuned for next news of VM performance improvement

Summary

We have many Challenges

Toward

Lightning RubyVM

Thank you

Toward Lightning

RubyVM

RubyKaigi2010 Lightning Talk

Presented by

Koichi Sasada

ko1@rvm.jp

This presentation is 1st time about

- English presentation in RubyKaigi
- LT presentation in RubyKaigi
- No joking presentation
- Preparing script
